► Guiyang Transportation Vocational and Technical College

Guizhou Vocational and Technical College of Transportation is a vocational college of science and technology with transportation as its characteristic.

► Real + Virtual

Guiyang Transportation Vocational and Technical College studio lighting project, the school specially selected two independent rooms, an area of 190 square meters, as the construction site of the campus studio lighting project (site-broadcast + virtual), the leader required the studio illumination to achieve: clear outline, characters without shadow, characters live face natural.

After the designer understood the situation of the scene and the needs of the leader, taking into account the soft light problem when the character was shot, it was equipped with 27 FS-LED5560 flat soft light lamps, designed the grape frame installation, and equipped with 8 FS-LED100W film and television spotlights.

FS-LED5560 flat soft light: for studio background light, surface light, side light, top light is the best, suitable for 20-100 square meters of city, county, schools, enterprises and institutions.

FS-LEDX780

► Beijing Supreme People's Procuratorate

Beijing Supreme People's Procuratorate studio in order to shoot education and law popularization video, to ensure the integrity of case video materials and better popularization of the law, released the studio lighting project bidding documents, requiring professional designers to layout.

Soundproof and color-changing glass is used on the walls of the studio and corridors.

► Hangzhou Sandun Primary School

Campus TV studio lighting design, is the rise in recent years, the school's own video recording is often fuzzy, not clear, its lighting design is really a headache.

Hangzhou Sandun Primary School studio lighting, mainly for the school for news, interviews, curriculum recording and broadcasting purposes. For this reason, the school specially uses the vacant classroom as the studio, and the leader requires the designer to design the corresponding program, which needs to achieve the imaging effect of uniform lighting, soft light and clear outline of the character.

► YueXi County TV Station, Anqing City

The visual studio lighting project at YueXi County TV Station is a comprehensive lighting project that includes three practical areas: seated broadcasting, interviews, and standing broadcasting. It is primarily used for program filming.

► Sitting Broadcast

Based on the requirements of the TV station leadership and the on-site conditions, our lighting designers have diligently worked on the lighting design. Multiple sets of fill lighting solutions have been designed for this project. We recommend using FS-LEDX780 and FS-LED5560 studio panel lights, a total of 36 units, for background lighting, side lighting, top lighting, and frontal lighting. Additionally, several FS-LED100W studio spotlight lights are employed for eye lights and contour lighting, emphasizing the presenters' sharp and focused appearance.

FS-LED5560

► Jianou News Media Center

Jianou News Media Center and Jianou Integrated Media Center's studio have undergone multiple revisions of the design proposals. Our technical team has visited the site in Jianou several times to conduct surveys and communicate the plans. Finally, the design proposal has been finalized.

► Liangzhou News Media Center

Liangzhou News Media Center and Liangzhou Integrated Media Center extensively compared various lighting manufacturers. Many manufacturers had a CRI (Color Rendering Index) greater than 90, but in the end, the company's leadership chose FARSEEING as their preferred choice.

FARSEEING's designers provided a customized stage design for Liangzhou Integrated Media Center, offering a comprehensive one-stop service from concept to completion. The leadership expressed great satisfaction with our products and services.

► Jilin Beihua University

The lighting project for the multimedia studio at Jilin Beihua University and Jilin Huabei University is a renovation and upgrade project.

► Real Virtual

The lighting designer responsible for the Jilin region understands that the studio is mainly used for high-definition program production. The university leaders have emphasized the need for overall even lighting and clear lighting contours in the studio. After understanding the user's requirements, our lighting designer has designed a comprehensive one-stop service. Combining both real and virtual elements, the lighting design plan incorporates LED film panel lights and LED film spotlights. These lighting fixtures are utilized for background lighting, side lighting, top lighting, and front lighting to achieve the desired effect.

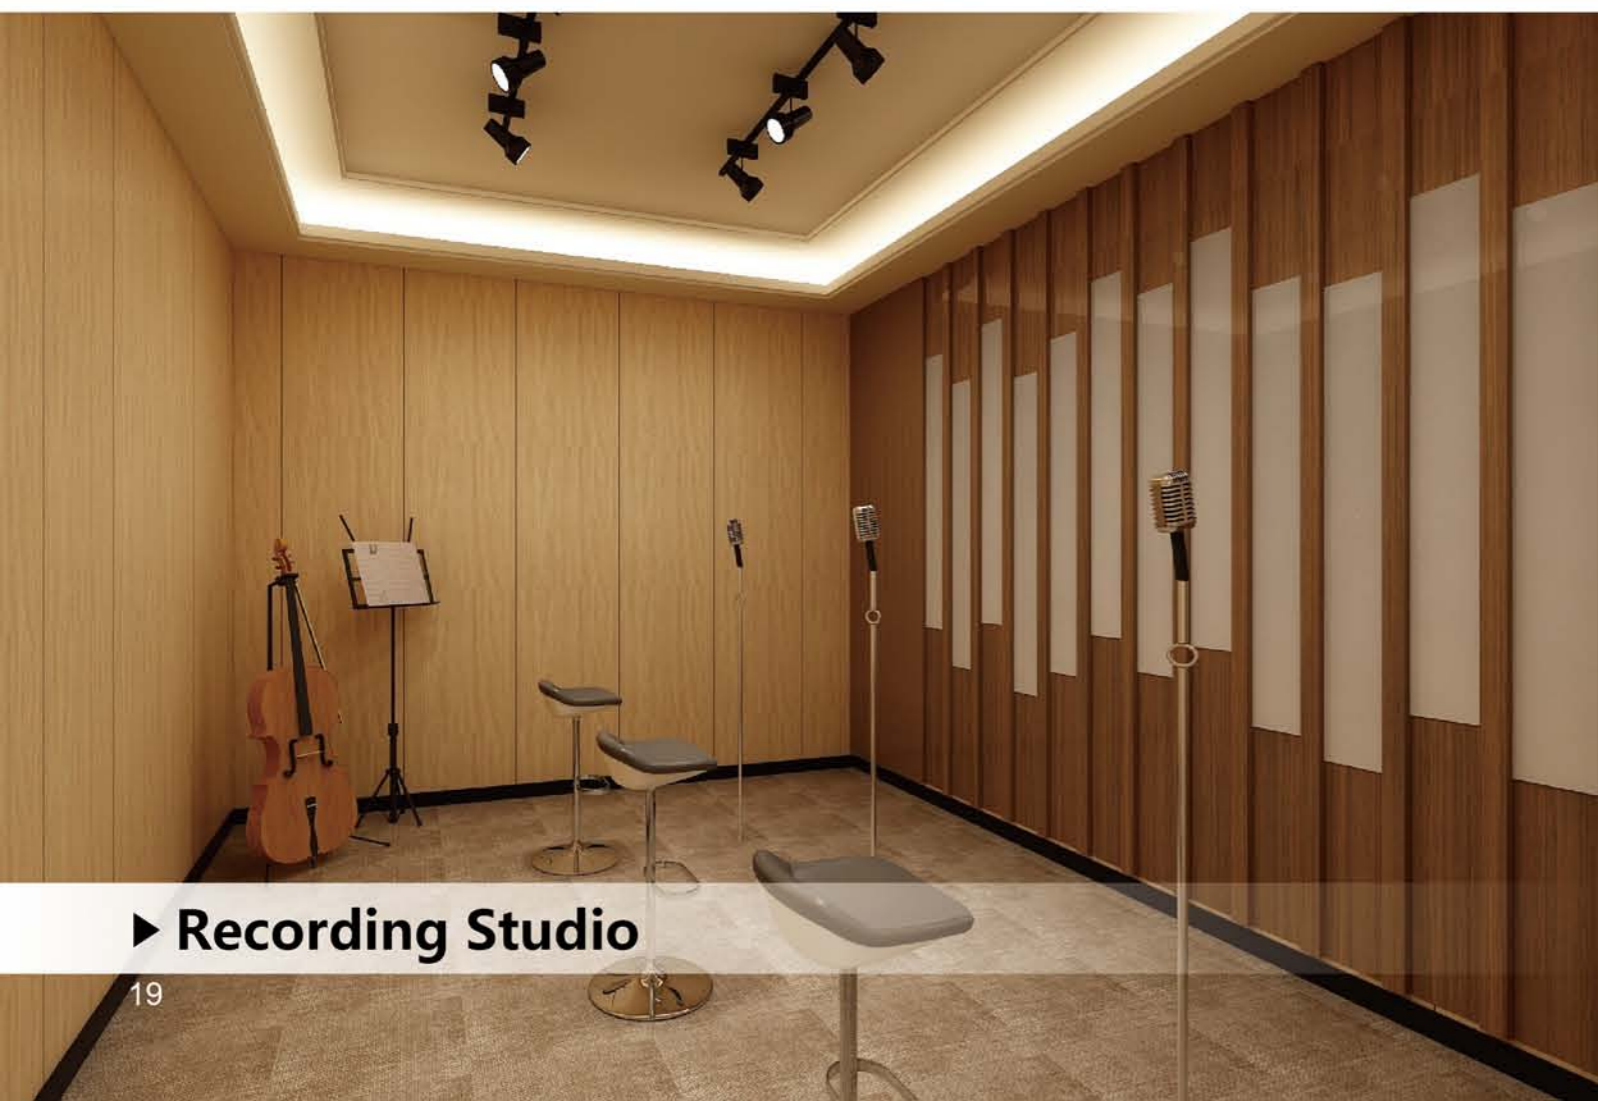

► Qishan News

For the lighting design layout at Qishan News, the lighting designers from Nan-jing FARSEEING have carefully considered the requirements of Qishan TV station's leadership and the actual on-site conditions. They have crafted a perfect lighting design layout that meets the specific needs of the station.

Product Advantages

FARSEEING Lighting consistently adheres to a rigorous quality control system and possesses independent intellectual property rights as well as multiple utility model invention patents. It is an industry-leading studio lighting enterprise with profound technological expertise. The product range is comprehensive and well-matched, providing a one-stop solution from design to installation and commissioning, making procurement easier and more convenient.

Industry Advantages

Over 1000 lighting engineering cases, nationwide site surveys, and comprehensive project design and pricing. FARSEEING Lighting has its own construction team and offers free technical guidance, free commissioning, and training. As a manufacturer, they have stock availability and can provide same-day delivery.

Service Advantages

A team of over 20 lighting designers with more than 16 years of industry experience, capable of delivering proposals and budget estimates within 24 hours. They offer free design services and provide CAD drawings. The company's after-sales service is available nationwide 24/7, with a 3-hour response time for telephone inquiries, 12-hour technical support response time, and 72-hour on-site response time.
